As a front-end developer, I work every day to create modern and functional user interfaces. Additionally, some time ago, I began exploring the field of manual QA, applying my attention to detail to ensure the quality and performance of web applications. I am committed to continuous learning and excited to contribute to challenging and innovative projects.

- **HTML5, CSS3, SASS...**
- **JavaScript:** ES6, third party APIs...
- Version control with **Git**
- **React:** creation of SPAs
